

SECURITY AWARENESS with PRIVACY PRINCIPLES

Helping your organization understand the role that both security and privacy play in data protection is easier than ever with this 30-minute online course. Key concepts are clearly presented to help build data protection awareness and improve learner behaviors.

The course uses a stimulating and creative approach that engages and challenges the learner. Realistic situations, knowledge checks, case studies, and examples are presented that add relevance and increase learner comprehension and retention. The goal: to create informed employees who make better decisions and lower risk. Good data protection practices will strengthen the consumer's trust in your organization and foster customer loyalty. Trust and loyalty are essential to maintaining lifetime, profitable customers.

Topics

- Protecting Data and Maintaining Security
- Safe Computing Practices
- Remote and Mobile Computing
- General Privacy Principles
- Protecting Proprietary Information
- Course Assessment
- Security and Privacy Resources

Course Features

- Includes Security and Privacy Content
- Highly Engaging and Interactive
- Real-Life Examples and Applications
- Professional Graphics and Voiceovers
- Easy to Tailor or Customize Content
- SCORM and AICC Compliant
- Award-Winning Design!

Implementation Options

Buy It - A "Best of Class" turnkey, pre-packaged solution.

Tailor It - Brand the course. Add organization-specific information in placeholders that are easy to update. Add a resources section to include messaging, contacts, policies, links, PDF documents, and any other supporting material.

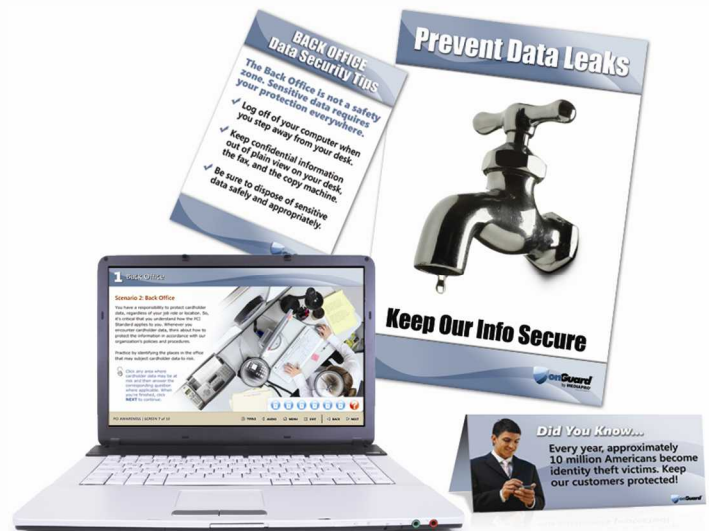

Customize It - Replace existing content (e.g., roles, examples, case studies, and graphics) with those specific to your organization. This level of customization may also include modifying existing voice-over. This solution is ideal for companies that have very specific or unique needs.

Access, Manage, and Track It - MediaPro's courseware is SCORM and AICC compliant and can be easily integrated into an organization's Learning Management System (LMS). Don't have an LMS? MediaPro also provides affordable, secure, on-demand hosting services.

About onGuard

The **onGuard Training** builds awareness by using a stimulating and creative instructional approach that engages the learner and uses realistic examples to add relevance to the content. Adult learning tactics and principles are applied to help your employees retain more and make better decisions. Proper awareness training is a key factor in improving workforce behavior and lowering your risk.

onGuard Awareness and Reinforcement Tools increase knowledge retention further by reinforcing key concepts and encouraging employees to follow security and privacy best practices. These award-winning tools help create and sustain a data protection "culture" within the organization.

About MEDIAPRO®

MediaPro is nationally recognized for producing award-winning, Web-based security and privacy training that reduces risk and improves employee compliance. In addition to the onGuard line of training for general security and privacy awareness, MediaPro also develops custom security and privacy e-learning courseware. MediaPro has won over 100 prestigious awards for instructional excellence.
