

IDENTITY THEFT RED FLAGS

Your organization has a legal obligation to protect customers and their private information from identity thieves. You can meet that obligation by following the new federal law known as the **Red Flags Ruling**. This ruling identifies known threats to consumer information—called “Red Flags”—and calls on employees to identify and react to these threats. In this brief 15-minute course, your employees will learn how identity thieves use trickery to access personal identifying information and how to recognize these Red Flag situations. By learning to spot Red Flags, they will protect your customers’ identities and your organization’s reputation.

Topics

- Being on Guard for Identity Theft
- Red Flag Basics
- Spotting Red Flags
- How Identity Thieves Work
- Red Flag Rules
- Your Organization’s Red Flag Program

Course Features

- Highly engaging and interactive elements
- Developed to be easily tailored or customized
- SCORM & AICC compliant for easy LMS integration
- Developed to ease translation and localization

Implementation Options

Buy It – A “Best of Class” turnkey, pre-packaged solution.

Tailor It – By branding the course, adding organization specific information in placeholders that are easy to update and adding a Resources section that can include messaging, contacts, policies, links, PDF documents, and any other information that supports the course.

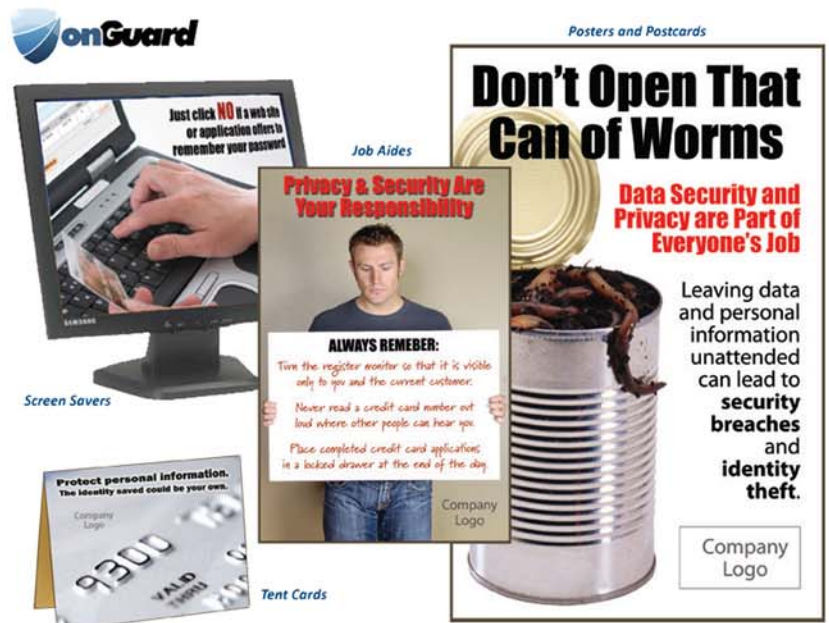

Customize It – By replacing existing content (e.g. roles, examples, case studies, and graphics) with those specific to your organization. This level of customization may also include replacing and modifying existing voice-over. This is ideal for companies that have very specific or unique needs.

Access, Manage & Track It – MediaPro’s **onGuard™ Security and Privacy Training** can easily be integrated into an organization’s Learning Management System (LMS), as we comply with SCORM and AICC Industry Standards. The training can also be delivered from MediaPro’s hosted LMS providing an easy, cost-effective, and secure turnkey hosting solution.

About onGuard™

Designed for all employees, **onGuard™ Training** provides a foundation of critical data protection principles. The curriculum is intended to help sharpen the employees’ existing knowledge of security and privacy, as well as present new information that impacts the entire organization.

Continuously encouraging employees to follow good information security practices, **onGuard™ Awareness and Reinforcement Tools** help employees to follow these practices as part of their daily job responsibilities. This integrated approach has been found to not only meet Federal compliance regulations and increase awareness of information security and data protection, but also to preserve that knowledge through consistent reinforcement.

About MEDIAPRO®

MediaPro, Inc. is nationally recognized for producing award-winning, web-based security and privacy training that reduces risk and improves employee compliance. In addition to the **onGuard™** line of training for general security and privacy awareness, **MediaPro®** also develops custom security and privacy e-learning courseware. **MediaPro®** has won over 100 prestigious awards for instructional excellence.
