

SECURITY AND PRIVACY TRAINING

It's critical that you protect and secure the private information of your customers and employees. These courses, created by data protection experts and produced by MediaPro, are very practical and focus on increasing data protection knowledge through realistic on-the-job situations.

Foundational Series:

Privacy Basics

This 20-minute course provides essential training on basic privacy principles and concepts for all employees on how to protect Personally Identifiable Information (PII).

Security Awareness

This course provides a foundation of critical security principles and is intended to help sharpen employee knowledge of data and physical security.

Security Awareness with Privacy Principles

This course provides a foundation of critical security principles, as well as privacy principles for protecting both PII and business information.

Governance Series:

Safe Remote and Mobile Computing

This course provides training on "best practice" data protection and security computing safeguards for employees who travel and work remotely.

Responsible Social Networking

This course defines the risks and consequences of social networking and provides guidance to help employees use social media responsibly.

PCI Awareness

This course provides employee security awareness training on how to safeguard payment card data as defined in the PCI DSS requirements (Req. 12.6.1.a).

Identity Theft Red Flags

This course provides training on how to identify and detect the relevant warning signs – or "red flags" – of identity theft as defined in the FTC Red Flags Rule.

Role-Based Series:

Privacy Awareness for Human Resources

Training that addresses protecting and securing the PII of prospective, current, and past employees.

Privacy Awareness for Information Technology

Training that addresses the unique needs of IT as they manage the "data life cycle" of PII within the organization.

Privacy Awareness for Call Centers

Training that builds awareness and understanding of call center privacy and security policies and practices.

Privacy Awareness for Sales & Marketing

Training for sales and marketing that provides prescriptive "best practices" for using and managing consumer PII.

Privacy Awareness for COPPA

Training that addresses the COPPA requirements for obtaining information from children under 13 years old.

Privacy Awareness for Hospitality

Training for hospitality industry employees that addresses protecting a guest's PII. *Available in English and Spanish; online, DVD, CD, and VHS.*

Implementation Options:

Buy It – A "Best of Class" turnkey, pre-packaged solution. Ready to go today!

Tailor It – Brand the course and add organization specific information to enhance the content.

Customize It – Add specific content (e.g. roles, examples, case studies, graphics, documents, etc.) that are unique to your organization.

Manage & Track It – The onGuard Security and Privacy courses can be easily integrated into an organization's Learning Management System (LMS). MediaPro also offers a hosted LMS providing an easy, cost-effective, and secure turnkey solution for tracking courseware access, usage and results.

About MEDIAPRO

MediaPro, Inc. is nationally recognized for producing award-winning, web-based security and privacy training that reduces risk and improves employee compliance.

In addition to the **onGuard** line of training for general security and privacy awareness, MediaPro also develops custom security and privacy courseware. MediaPro has won over 100 prestigious national and international awards for instructional excellence.
